- Environmental Protection Agency (EPA)
- Tertiary institutions

# SOLUTIONS TO DISTRESSES

- ❖ Disasters are a great source of concern. They pose the greatest threat to security of individuals and a setback to national development.
- ❖ Many people are displaced, injured and even killed. There is also an abnormal level of damage to structures, roads and other civil works as well as the disruption of utility services
- ❖ They have long lasting economic and psycho social effects on survivors and governments.
