

## AGENDA TOPIC: SESSION 3 TOWARDS THE PLAN OF WORK

Results of this session are:

- GP-STAR focuses on supporting Sendai framework implementation, its expected outcome and goal, according to the following Sendai framework components:
  - Supporting the assessment, monitoring and evaluation of Sendai global targets and indicators
  - Support Priority for Action 1 “Understanding disaster risk”
  - Support Priority for Action 4 “Enhancing disaster preparedness for effective response, and to «Build Back Better» in recovery, rehabilitation and reconstruction
  - Support the guiding principles
- Working groups have been established to work on specific requirements of Sendai framework components listed above
- Timeline for working groups, except for preparation 2017 Global Platform Session group, is 2-3 years
- Working groups follow a generic conceptual approach with user needs / Sendai framework requirements as end points, these are:
  1. Baseline study: What methods, initiatives, results do exist
  2. Baseline study: Comparing, evaluating and documenting
  3. Develop best-practices / conceptual guidance
  4. Feasibility and demonstration studies (national level: usability, fit for purpose)
  5. Evaluate transferability, robustness
  6. Develop and conduct capacity-building
  7. Generate policy relevant advise
- The following Working groups have been established:

Name of Working Group	Sendai framework component	Members
“Cancun”: Preparation of GP-STAR side event, including brochure, fact sheets and GP-STAR web page, for Global Platform Session Cancun, Mexico 2017	All	GEO, UN-SPIDER, DMC-SL, ISPRS (tbc), IWG-SEM, CEPREDENAC, AEM
Volcanos (tbc)	Priority 1	DLR, CEPREDENAC, CEOS (tbc), GEO POs (tbc), ISPRS (tbc)
Droughts	Priorities 1 and 4, global targets and indicators	DMC-SL, IWMI, UNCCD, WMO, CNE-DR, ESCAP, ZFL UniBONN , ISPRS (tbc), GEO POs (tbc), UNU-EHS
Sand and dust storms	Priorities 1 and 4	UNCCD, WMO (tbc), NDRCC (tbc), SDIM (tbc), ISA –Iran (tbc), UN-SPIDER, ISPRS (tbc)
Tsunami	Global targets and indicators	Tohoku University, MMAF-Indonesia, Sentinel Asia, UN-SPIDER, GEO, ISPRS (tbc)
Flood	Priorities 1 and 4, global	IWMI, IWG-SEM, Sentinel Asia

	targets and indicators	(tbc), DMC-SL, CNE-DR, GEO POs (tbc), CEOS (tbc), EC [DG-JRC, COPERNICUS] , DLR (tbc), WMO, UNCCD
--	------------------------	---

Action Items:

- Secretariat to suggest generic conceptual approach to be then approved by GP-STAR and to be then considered by all working groups
- Working group members to initiate work, work modalities and regular communications
- Working groups to start baseline study as important input for Global Platform 2017, Cancun, side-event
- Secretariat to provide template for fact sheets to be used for baseline studies and Global Platform Session GP-STAR side event dissemination material
